

### Novelist - Browse Lists and Articles

#### Browsing Reading Lists by Topic (Recommended Reads)

Novelist has hand-selected over 800 Recommended Reads lists for readers of all ages. These lists are organized by fiction (and nonfiction in Novelist Plus and Novelist K-8 Plus), genre or topic, and reading level in the “Recommended Reads” section of the homepage.

1. On the left side of the homepage, in the Recommended Reads section, select the **Fiction or Nonfiction tab** to view the appropriate lists.
2. Select the **audience level link** at the top of the section.
3. Select the **genre or topic** you are interested in. A pop-up window will display showing all available lists for the selected topic.

All lists are updated regularly with books chosen by librarians who are well-versed in the genre/topic.

#### Browsing Other Lists and Articles

Browse our lists and articles from the **Quick Links** drop-down in the top toolbar. When you select a link from that drop-down, you will pull up a Result List that can be sorted by date, author, or title.
