

Novelist - Find Title Recommendations

Novelist makes it easy to find read-alikes for your favorite books. You can find recommendations in each title record in your Result List and at the Book Detail page.

Find Read-alikes at the Detail page

1. Enter a **title** in the Basic Search Box.
2. From the search options drop-down menu, select **Title**.
3. Click **Search**.
4. From the Result List, select the **title** for which you want recommendations. This will open the Book Detail page.

In the “Read-alikes” section on the right side, you’ll find up to nine title recommendations.

With your mouse, you can hover over a book jacket image or magnifying glass icon to view information about the title recommendation and why it is recommended.

You can print all of the title recommendations, along with the reason they were recommended by clicking the **View All** link at the top of the “Read-alikes” section.

Search for More

The “**Search for More**” feature at the bottom of the Detail page allows you to find similar titles based on the title’s genre, subject, location, and appeal factors that are of interest to you.
